

Streamlined process and systems support fast growth

STANLEY Security offers innovative solutions for safety and fire protection. It is part of the STANLEY Black & Decker Group which has more than 60,000 employees around the world.

INFO

INDUSTRY: Professional Services
SIZE: 800 employees in 30 locations
LOCATION: Sweden
PRODUCT: Unit4 Enterprise Resource Planning (ERP)

The Challenge

STANLEY Security's business operations were growing rapidly in Sweden and the company needed to support this growth and attain visibility to make accurate and fast business decisions.

Achievements

Improved decision-making

Executives can make better-informed and faster decisions to support a rapid business strategy.

More time for customers

Administration is significantly reduced, freeing employees to focus on improving customers' 'safety chains'.

Optimizing projects

Centralized and streamlined project management and people-focused reporting improved project efficiency.

Different country operations had different systems making it difficult to retrieve and use information. In Sweden we needed a flexible system that could manage local requirements and provide a platform for growth.

Jan Vesterberg, IT Manager

How did Unit4 help?

- Broad capabilities and new processes led to fewer systems needed to manage finance.
- Centralized reporting for project visibility.
- More comprehensive project reporting for better decision-making.
- One system for time registration and transactions for follow-up, invoicing and salaries.
- Mobile timesheets for field staff.
- Easy upgrading for cost-efficiency.

Impacts

Fewer systems needed to manage operations

Less time on admin, more on the mission

Greater project efficiency
