

## Operating with excellence to make the world greener

GGGI is a treaty-based international organization that helps developing countries transition to a sustainable and socially inclusive model of economic growth.

**INFO**  
**INDUSTRY:** Nonprofit  
**SIZE:** Operates in 31 countries  
**LOCATION:** Republic of Korea  
**PRODUCT:** Unit4 Enterprise Resource Planning (ERP) - Cloud

## Achievements

**Real time insight**  
 Real time data through self-service gives everyone the flexibility to get the data they need when they need it. Provides up to the minute reporting for staff and different stakeholders.

**Project excellence**  
 Managers can monitor project progress and manage funds efficiently, which leads to on-time completion.

**Speedy and streamlined**  
 Back-office processes are streamlined and paperless. Replaced cumbersome approvals with an automated process. Simplified financial consolidation.

## The Challenge

GGGI struggled with different operational models in the 27 countries it collaborates with. This delayed their ability to release results, which is a key to progress in a nonprofit organization.

**With Unit4 ERP: “We’ve broken the barrier: the system is instantly available, it’s user friendly, and gives us real-time information which is very useful for management decision making.”**

Sivabalan Muthusamy, Director of Finance

## How did Unit4 help?

- Standardized core processes; at the same time allowing decentralization of operations to meet local country conditions
- Cloud secures compliance with international data protection regulations
- Delivers IT best practices, such as data back up and disaster recovery
- Flexible system that can be adapted to changing needs with little specialist support

## Impacts

- 70%** Reduction in time needed for approvals
- 50%** Shorter turn-around for financial closing
- Improved project start-up and on-time completion
