

Province of Zeeland chooses Unit4 ERPx as new ERP solution

Unit4, a leader in cloud business software for service-centric organizations, today announces that Province of Zeeland has chosen Unit4 ERPx. The province has partnered with Unit4 since 2004 and has been using Unit4 Financials by Coda in recent years. With the move to ERPx, Zeeland continues this long-standing collaboration. The new solution helps the province digitalize internal processes and organize them more intelligently and efficiently.

Future-ready through digitalization

With more than 390,000 residents, the province plays an important role in the social and economic development of Southwest Netherlands. Further digitalization is essential to this mission. ERPx forms a key building block in that development. The choice for ERPx was driven by three factors: the modern SaaS nature of the platform, the flexibility it offers, and Unit4's expertise in the public sector. The solution enables the province not only to meet current requirements for compliance, reporting, and user-friendliness, but also to respond to future innovations. The software is easily expandable and regularly updated, ensuring the province always has access to the latest technological updates.

Britt Rijk, Team Leader Finance at Province of Zeeland: "When choosing a new system for our internal processes, we looked at the features, but also built on our strong existing partnership with Unit4. Unit4 knows our organization inside and out and understands the dynamics within public sector organizations like no other. The trust in our partnership, combined with Unit4's expertise, was the deciding factor in taking this step together toward implementing a new solution."

Wilfried Teunissen, Sales Manager Public Sector at Unit4: "Province of Zeeland's choice for ERPx shows that governments are increasingly focused on digital agility. With ERPx, they not only meet today's functional and technical requirements, but it also positions them to stay agile for the future. Thanks to our years of experience in the public sector, we can optimally support the province in implementing this solution, enabling them to work more efficiently and flexibly."

About Unit4

Unit4's next-generation Enterprise Resource Planning (ERP) solutions power many mid-market organizations worldwide, bringing together Financials, Procurement, Project Management, Human Capital, and FP&A capabilities to share real-time information and deliver greater insights to help organizations operate more effectively. By combining our mid-market expertise with a relentless focus on people, we've built flexible solutions designed to meet customers' unique and changing needs. Unit4 serves more than 5,100 customers globally across multiple sectors, including professional services, nonprofit, and public sector, with customers such as Migros Aare, Southampton City Council, Metro Vancouver, Durham Catholic District School Board, Buro Happold, Peab, North Sea Port Nederland, Save the Children International, Global Green Growth Institute, and Oxfam America.
