

Modernize nonprofit procurement with the Unit4 S2C solution

Transforming procurement for nonprofits

The Unit4 Nonprofit **Source-to-Contract** (S2C) model is designed specifically to revolutionize procurement processes for nonprofits.

Built to enhance efficiency, improve visibility, and ensure continuity, this software empowers your nonprofit organization to focus on its mission while managing resources effectively.

Key features & benefits

- **Enhanced procurement efficiency:** Automate processes and consolidate spend management to save time and resources.
- **Sourcing data at your fingertips:** Quickly analyze data for informed decision-making with tools like Spend Analytics, eRFx, and eAuction.
- **Streamlined compliance & audits:** Gain complete visibility with tools ensuring supplier compliance and audit readiness.
- **Dedicated nonprofit tools:** Support project management, donor and fund management, and grant tracking in one integrated suite.
- **Secure data management:** ISO 27001-certified to ensure top-tier cybersecurity for your sensitive information.

Seamless integration

Our Nonprofit S2C solution integrates with either ERPx or ERP7 Cloud (7.12 onwards). For contract management and supplier management this enables the creation and update of mandatory ERP API fields. For spend analytics, purchase invoices are integrated, with supplier and contracts to follow.

Increased financial transparency

Get real-time performance analysis to track where every dollar is spent. Use Spend Analytics for financial insights or host an eAuction to reduce procurement costs.

Our modular **S2C** suite is designed for nonprofits to scale effortlessly by adapting to their needs. Start with core capabilities like supplier management or contract tracking and add advanced features—such as strategic sourcing and spend analytics—only when needed, saving on upfront costs.

Standout features include **interactive eAuctions**, **integrated supplier management**, and **effortless compliance tools**. Connecting directly with Unit4 ERP procurement aligns smoothly with finance and operations, empowering your teams to focus on making a difference.

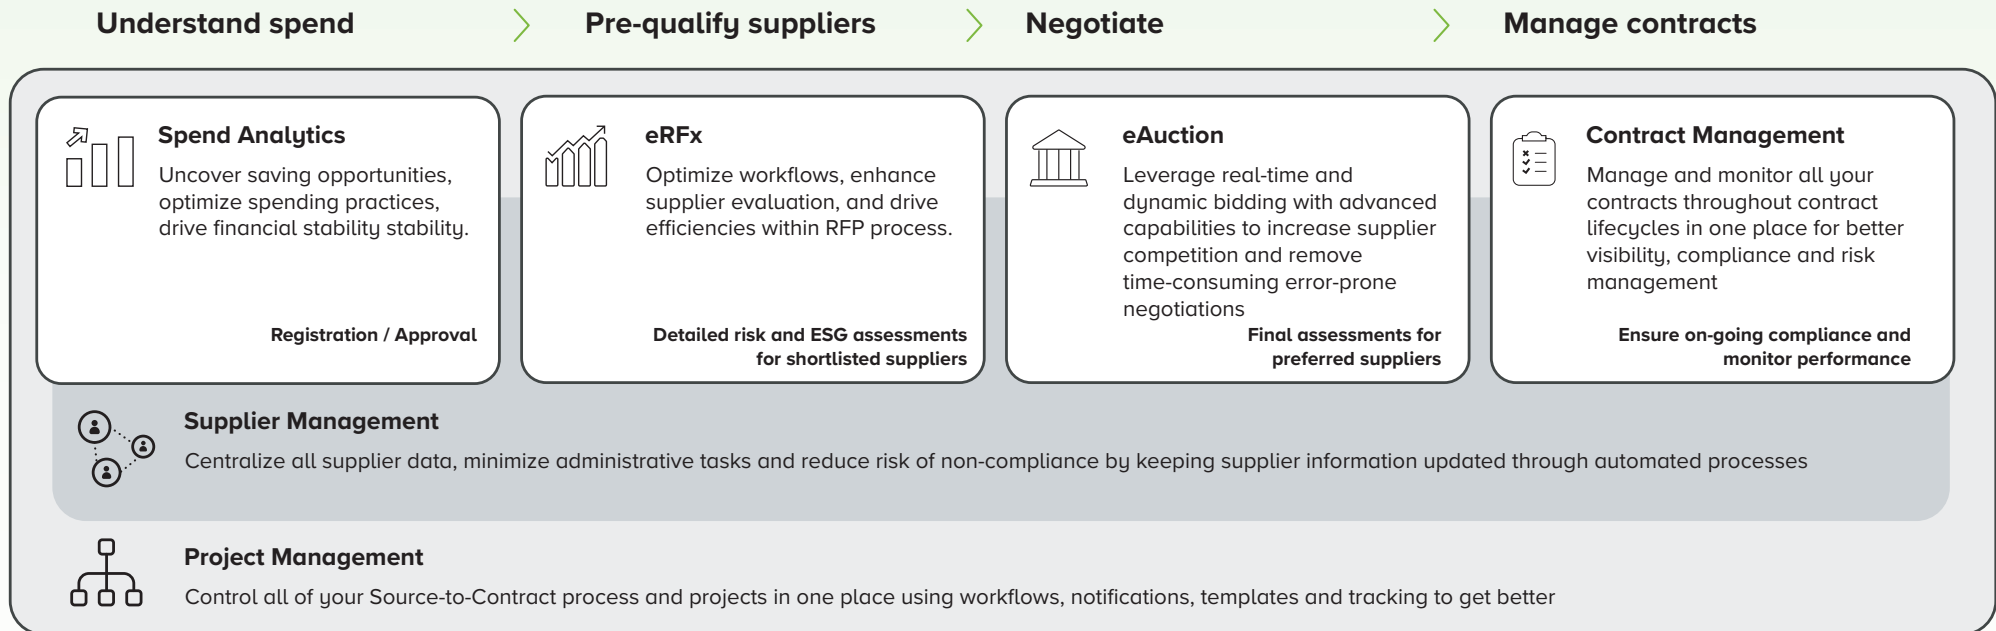

Empowering your mission

Unit4's S2C tools ensure your nonprofit operates with agility and transparency, optimizing resources so you can do more of what matters—making a positive impact on the world.

Streamline procurement with nonprofit S2C solution

Achieve greater productivity and focus across financial transaction and contract management with a comprehensive procurement solution that simplifies processes, optimizes sourcing, and ensures compliance.

From Sourcing to Contract Management – A flexible suite of products that support you at every stage.

81%

expect operating costs to rise

To sustain financial health, nonprofits must explore cost-efficiency measures and lean operating models alongside income-generation strategies.
