

Fund management

Unit4 Nonprofit Model capability overview

Unit4's Fund Management solution for nonprofits is a comprehensive platform designed to streamline financial operations, enhance transparency, and optimize decision support, to enable nonprofits to focus more on delivering upon their mission.

Nonprofit can efficiently manage funds, track outcomes, and ensure compliance with regulatory obligations, easier than ever before. By focusing on fund management, the Unit4 Nonprofit Model provides out-of-the-box functionality for finance, projects, and HR that empowers nonprofits to more productively allocate resources and track mission-driven outcomes with enhanced transparency and financial resilience.

Key features

Fund management

- Centralized fund tracking and allocation for multiple projects and programs.
- Near real-time visibility into fund balances, grants, awards, and donations.
- Automated fund distribution and transfers for more efficient resource allocation.

- Comprehensive reporting on fund utilization to support donor reporting and compliance.

Opportunity funding

A comprehensive platform to optimize financial operations and enhance capabilities for nonprofit opportunity funding, including capabilities to deliver more submissions.

Our opportunity finder is a centralized and searchable database that displays grant funding opportunities for nonprofits, from any UK or international funder, including government grants, private foundations and industry sponsored funds. This reduces a nonprofit's burden of challenges with fragmented systems and manual processes that hinder the ability to make applications for funding. Capabilities include:

- Funding Opportunities scanner with AI intelligence.
- Set up customized alerts-based on funder.
- Deadline alert reminders by opportunity and funder.

With benefits for your nonprofit such as:

- Reduce manual processes with better data availability and automation.
- Save significant time by not having to manually search funding opportunities.
- Easily navigate the complex landscape of nonprofit funding.

Increasing transparency

Maximize the impact of every dollar, euro or pound received, ensuring that more resources are directed towards our programs and services. Within a single unified solution for opportunity fund management, the process isn't just easier and better value but also enables nonprofits to extend their fund management with a view on mission impact.

Outcome-based accounting

- Align expenses with specific program outcomes and mission impact metrics.
- Dynamic cost allocation based on predefined goals and KPIs.
- Near real-time tracking of expenses tied to programmatic achievements.
- Detailed reports and pre-built dashboards showcasing the financial impact of realized mission outcomes.

Benefits

- **Transparent resource allocation:** Gain a clearer view of fund usage across programs.
- **Impact-centric reporting:** Connect financial data to programmatic achievements.
- **Grant and donor compliance:** Easily generate reports for grantors and donors, showcasing fund utilization aligned with goals.
- **Real-time decision-making:** Access up-to-date financial and outcome data.
- **Efficient auditing:** Simplify audit processes with traceable financial transactions tied to program outcomes.
- **Strategic planning:** Utilize data-driven insights to align financial strategies with your nonprofit's mission.

Product capabilities

ERP integration

- Low code/no code solution with easy extensibility to other applications.
- Aligned to Nonprofit Common Data Model.
- Seamlessly integrate to Unit4 FP&A, HCM, and Source to Pay solutions.
- Automated financial entries directly linked to ERP transactions.
- Enhanced financial accuracy through synchronized data and a single source of truth

- Generate responsible procurement options based on available funds and program needs.
- Integration with procurement workflows to ensure budget adherence.
- Contract management, spend management, and procurement automation capabilities
- Near real-time tracking of procurement costs against allocated funds.

Technical specifications

- **Deployment options** - Cloud-based models.
- **Integration** - API-based integration with industry mesh. Aligned to Nonprofit Common Data Model
- **Security** - Industry-standard encryption and data protection mechanisms..
- **Scalability** - Designed to accommodate growing organizational needs.

Maximizing funding for greater impact

Our Fund Management and Outcome-Based Accounting Software Suite redefines how organizations manage funds, align expenditures with outcomes, and enhance financial transparency.

By seamlessly integrating with ERP, HCM, procurement, and FP&A systems, this suite empowers nonprofits to make informed decisions, optimize resource allocation, and fulfill their mission with impact while maintaining compliance and accuracy in their financial operations.

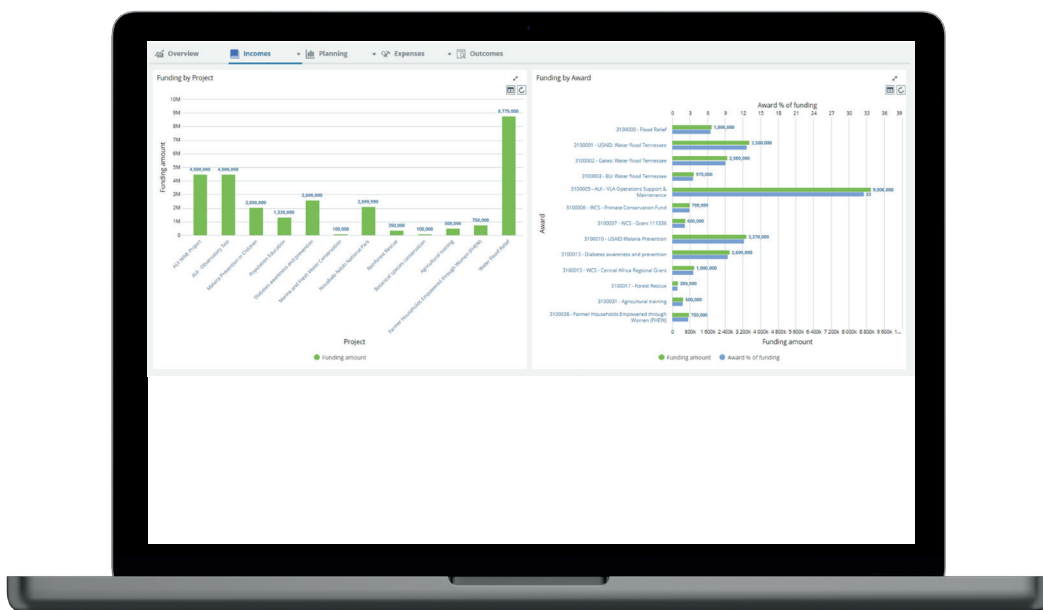

Image 1.0 Nonprofit Funding analytics summary

“With Unit4, it allows us to have all information available, worldwide, in one system, accessible from all different locations where we work. Unit4 is a flexible system that allows us to track our funding, grants, sub-grants and the different projects that we have to comply with donor requirements.”

Fiona Buruma

Director of Finance and Operations, War Child
