

# Unit4 App Studio

Tailor your ERP for maximum efficiency

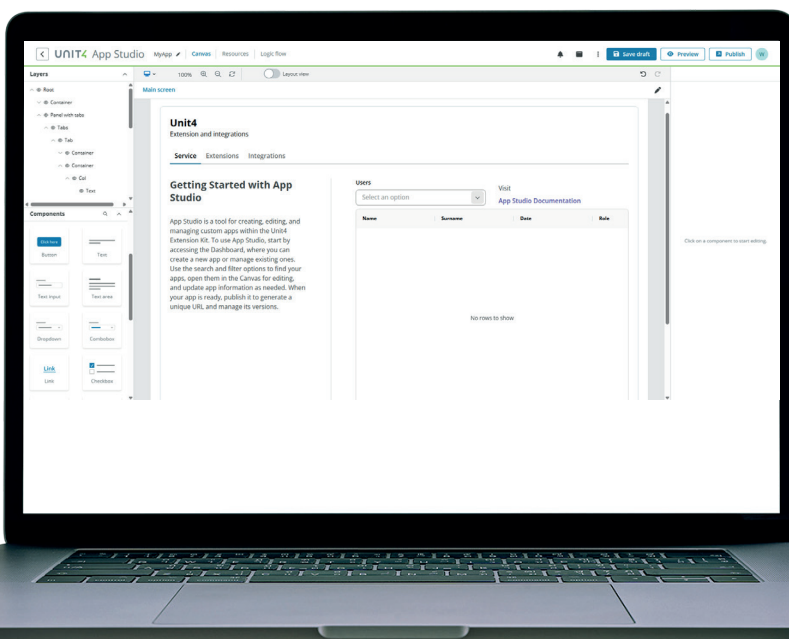

**Achieve faster workflows, reduce operational complexity, and enhance user satisfaction by creating custom ERP screens and applications that fit your unique business needs.**

Save time, minimize errors, and free up resources for your finance, HR, and operational teams with tailored ERP solutions that align with your organization's goals. Unit4 App Studio enables business users to adapt their ERP without heavy reliance on developers or technical expertise, ensuring scalability and ease of use.

Unit4 App Studio, offers a low code/no-code platform to create and modify ERP screens. With simple drag-and-drop functionality, you can customize your ERP to fit your specific requirements quickly and easily.

## Why choose Unit4 App Studio?

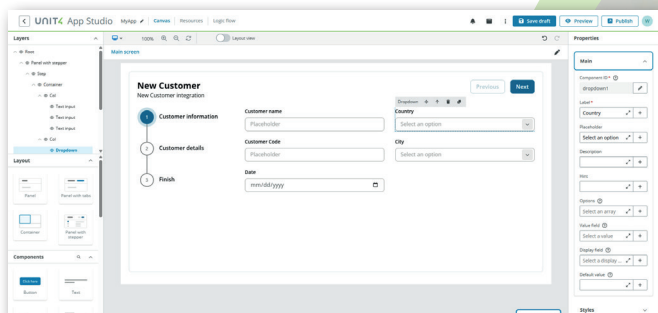

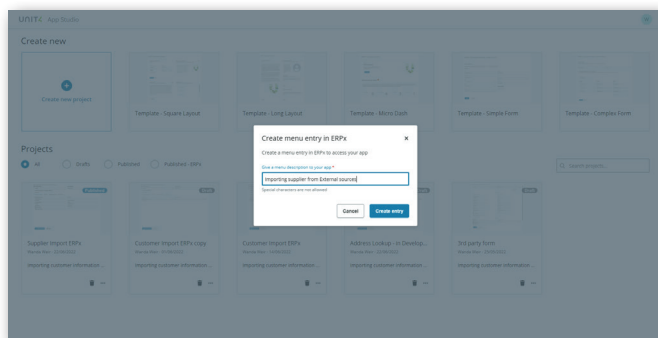

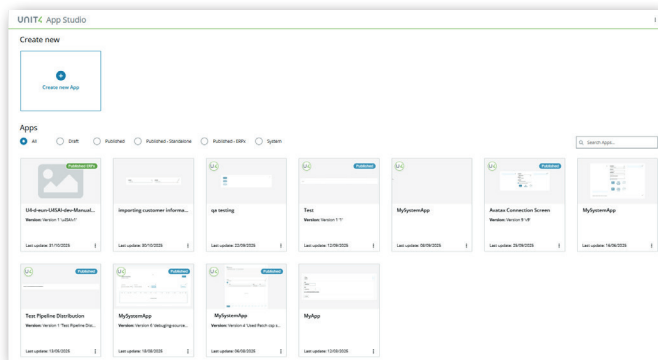

- **Flexible customization:** Build screens tailored to your processes with minimal effort.
- **User-friendly design:** Empower your team to innovate with an easy-to-use, low-code environment.
- **Seamless integration:** Custom screens blend seamlessly into your ERP, ensuring security and usability while staying separate from the ERP's core codebase to allow smooth upgrades.
- **Enhanced security:** Ensure only authorized users can make changes with role-based configuration access.

## How does it work?

Unit4 App Studio allows you to easily create and deploy custom screens in a secure, cloud-based environment:

- **Low-code design:** Drag-and-drop tools enable fast screen creation by non-technical users while more savvy users can leverage its advanced functionalities
- **Functionality boost:** Enhance the functionality of the apps you create by leveraging extension capabilities using Unit4's Extension Kit, allowing you to seamlessly integrate additional features and capabilities.
- **Integrated deployment:** New screens integrate directly into your ERP system, maintaining a consistent user experience and adhering to security standards. They can also function separately from the core system.

## Key benefits

### Fit for your business

- Flexible, tailor-made screens designed to meet your unique needs.
- Seamlessly extend Unit4 ERP implementations with custom screens.
- Build apps that run across all devices while maintaining the familiar Unit4 look and feel.

### Automation and validation

- Automate data validation and business processes to ensure consistency (e.g., format requirements of data).
- Add business logic to new screens and forms (e.g., validation of local bank details).

### Easy configuration & maintenance

- Avoid complex coding with a simple drag-and-drop interface.
- React quickly to business process changes without the need for external developers or consultants.

### How can I access App Studio?

App Studio is included as part of Unit4 Extension Kit and is available for all customers on ERPx.

“ [App Studio] has allowed us to streamline processes that previously required multiple manual steps, consolidating data management and minimizing errors. ”

Arribatec Group

Technology consulting company

## Challenges solved using App Studio

### Solution for Italian Tax Compliance

**ARRIBATEC**, a global consulting organization, was struggling to efficiently manage tax transactions across different geographies, particularly in Italy. Compliance with Italian localization requirements was a complex and error-prone process. They struggled to meet regulatory demands, such as enriching transaction data with mandated fields while ensuring data accuracy and organization.

### Solution with App Studio

Using App Studio, ARIBATEC developed an application that simplifies tax compliance by automating key processes:

- **Data retrieval and registration:** The app allows users to retrieve and record tax transactions with ease, ensuring accurate and well-organized data management.
- **Regulatory compliance:** It automatically enriches tax transaction records with the required fields mandated by Italian regulations.

With a structured, multi-screen design, the app guides users step-by-step through the compliance process, offering a streamlined and user-friendly workflow that reduces errors and saves time.

“ App Studio provides our business with the platform flexibility we require...to extend to fit our unique needs, digitize our paper-based forms and processes, and create the technology-enabled environment that ACOR strive to deliver for our people. ”

ACOR Consultancy

### Driving process efficiencies for consultancies

**ACOR**, a multi-service engineering consultancy based in Australia, faced inefficiencies in several operational areas, including evaluating project proposals, gathering client feedback, and processing credit requests. Existing workflows were manual and time-intensive, leading to delays, inconsistencies, and limited visibility into strategic alignment and customer satisfaction.

### Solution with App Studio

App Studio enabled ACOR to develop three targeted applications to address these challenges:

- **Go/No-Go App:**

**Challenge:** Project evaluation lacked a standardized process, making it difficult to assess resource availability and strategic alignment.

**Solution:** The app provides staff with a high-level overview of project requirements, allowing them

to quickly evaluate proposals against resource availability and strategic goals.

- **Client Feedback App:**

**Challenge:** Collecting and analyzing client satisfaction data was time-consuming and lacked actionable insights.

**Solution:** This app streamlines the feedback process through structured surveys, enabling ACOR to gather insights on client experiences and identify areas for improvement efficiently.

- **Credit Request App:**

**Challenge:** The credit request process was slow and error-prone, requiring manual data entry and multiple approval steps.

**Solution:** The app automates the workflow by allowing users to search for invoice numbers, auto-populate relevant data, and submit requests with a single click after entering a reason. This reduces manual effort, ensures data accuracy, and accelerates approvals.

By leveraging App Studio, ACOR streamlined these critical processes, improving efficiency, reducing errors, and enabling faster, data-driven decisions.

## App Studio: Delivering value with every screen

Unit4 App Studio empowers your organization to operate more efficiently, scale effectively, and adapt quickly to change by putting customization capabilities directly in the hands of your team.

“

The configurability found in the cloud only goes so far and almost always falls short of the extensive customizability found in the on-premises software... Unit4 shows great savvy in launching App Studio. The flexibility it offers helps users to benefit from the cloud while simultaneously recreating or emulating what they always liked about their legacy deployments.
